

# MINNESOTA CHILD SUPPORT ENFORCEMENT DIVISION

## COMPARATIVE DATA FOR MANAGING PROGRAM PERFORMANCE

**FEDERAL FISCAL YEAR 2011**

(FFY 2011 DATA IS DERIVED FROM THE DECEMBER  
SUBMISSION OF THE ANNUAL OCSE 157.)

**Condensed version for MFSRC - September 2012**

If you would like to print the entire Comparative Data Report, the document is located on DHS-SIR> PRISM > Performance Resources > County and State Performance Data > Comparative Data Report – FFY 2011

[Full Comparative Data Report FFY11](#)

## Tier Groupings

### Tiers - Different sorting than the Annual Performance Report

In sorting by tiers, based on caseload size, there is a small degree of commonality between the counties that are grouped together. The old Self-Assessment Tiers were used, however the top three groups were combined which give us the Big-9.

## SPM – Supporting [supportive] Performance Measures

### SPM – Supporting [supportive] Performance Measures

Better reflects the actual work or actions that produce the outcomes, which are reported on the 157 performance report. These measures represent potential areas for analysis which are not as broad as the Federal Performance Measures.

#### SPM1 – Percent of Cases with Collections of Current Support

- Supports the Federal Performance Measure [FPM] – Collections on Current Support.
- This FPM measures the percent of collections distributed to current support against the amount of current support due.
- This SPM measures the number of cases with a distribution to current support against the number of cases with current support due.
- Generally, there is a larger ratio on the number of cases that are receiving current support over the measure of fulfillment. There may be a small number of cases that have high dollar orders that skew the ratio, or cases that require modifications because the obligor's circumstances have changed etc. Using the SPM allows you to measure how many families are getting at least some of their child support.
  - Line \*25 Case Count for Amount Reported on Line 25 of the 157
  - Line \*26 Case Count for Amount Reported on Line 26 of the 157

#### SPM2 – Average Amount Distributed per Case with a Collection

- Supports the FPM – Collections on Current Support and Cases with an Arrears Distribution.
- Where the FPM - Collections on Current Support measures fulfillment of the obligation, the FPM - Cases with an Arrears Distribution measures even an insignificant amount distributed to a case with arrears due.
- This SPM measures the average amount distributed to each case with a collection by dividing the distributed collections from the OCSE 34a by the number of cases with a collection as reported on the OCSE 157.
- The SPM is more representative of the effectiveness of caseload collections because you are measuring the impact of all monies collected to the total number of cases with a collection, whether current or arrears. This would not include cases with reserved or zero obligations, or medical only

- cases that dilute the "per case" ratio
  - Lines 4b + 4c + 8 on the OCSE 34a - cumulative, sum of 4 quarters
  - Line 18 on the OCSE 157 - unduplicated, aggregate

### **SPM3 – Percent of Cases with a Support Order Established During the Report Period (Aggregate)**

- Supports the FPM – Cases with Support Orders Established (Cumulative).
- This FPM encompasses the universe of open cases rather than those entering the caseload. It does not measure the timeliness of establishment.
- This SPM looks at the percentage of cases requiring establishment that get an order within the federal fiscal year and can be used to gauge performance expectations. The SPM does not differentiate between those cases that come into the caseload with an order or those where the county initiates and obtains the order.
  - Line 17 Cases with Support Orders Established During the Period
  - Line 12 Cases Requiring Services to Establish a Support Order

### **SPM4 - Paternities Established or Acknowledged During the Report Period (Aggregate)**

- Supports the FPM - Percent of Out of Wedlock Children with Paternity Established.
- This SPM looks at the percentage of cases requiring paternity establishment that obtain a paternity order within the federal fiscal year and can be used to gauge performance expectations. The SPM does not differentiate between those cases that come into the caseload with an order (dated within the reporting period) or between county or hospital initiation of the order.
  - Line 6b – Children in Open IV-D Cases Without Paternity Est
  - Line 16 - Children in the IV-D Caseload for Whom Paternity was Established or Acknowledged During the Period (Aggregate)

### **SPM5 – Percent of Cases with Support Orders Established with Medical Support Ordered and Provided**

- Supports potential FPM – works toward the federal strategic goal of medical coverage for all children.
- No final notification has been received by OCSE as to the specifics of a Medical Support Performance Measures. The calculation being used is based on the lines that were being audited in previous years.
  - Line 2 – Cases With a Support Order
  - Line 2e – Arrears Only Cases
  - Line 21a – Cases with Medical Support Provided

**SUMMARY OF SUPPORTING PERFORMANCE MEASURES
